

WH2000iXLT

Digital Inverter Generator

1800 / 2200
RUNNING WATTS STARTING WATTS

CLEAN POWER

< 3% THD electrical output

Westinghouse

INNOVATION YOU CAN BE SURE OF

*Cord Sold Separately. Please request WHPC P/N 260041

WH2000iXLT Units Are Parallel Capable

Parallel capability allows you to combine (2) units for **DOUBLE** the power using our simple to use WHPC parallel power cord (not included).

No bulky, complicated junction boxes, hardware or complicated ground terminal wiring needed with this easy-to-use, compact system.

WH2000iXLT Parallel Capable* Digital Inverter Generator

*Cord Sold Separately. Please request WHPC P/N 260041

What is a Digital Inverter Generator?

Digital inverter generators work by generating AC (alternating current) power at a high frequency. It is then converted to DC (direct current), then back to alternating current that can be used by electronic equipment and appliances. This process is often called "clean power" which means stable and consistent current and a stable sine wave delivery. This will not cause a fluctuation in voltage which happens with traditional generators. Uncontrolled fluctuations of power are very dangerous to many high-tech and sensitive electronics such as computers. Inverter generators are a perfect fit for recreational use and emergency backup power.

The engine speed of inverter generators is regulated to match the load on the generator, unlike traditional generators that run at a constant speed with no variation to engine speed. Inverter generators have the ability to adjust engine speed to produce the correct amount of power required to run the appliances being used. Inverter generators are more fuel efficient and make less noise and vibration than traditional generators. This makes inverter generators economical to operate and environmentally friendly.

When you are ready to go camping, tailgating or just need a reliable portable power supply, the Westinghouse WH2000iXLT provides efficient, quiet and clean energy for all your sensitive electronic needs - while offering parallel capabilities.

Producing 1800 running watts of power and weighing only 43 lbs., this 4 cycle, gasoline powered unit will run 13 hours at 50% load. This unit provides two, 120V, AC outlets and contains all you need to get started right out of the box - **including the oil**. The WH2000iXLT is very quiet making it the perfect companion for all your recreational needs.

Specifications

| | |
|-----------------|---------------------------------------------------------------------------------|
| Generator Type | WH2000iXLT Digital Inverter |
| Running Watts | 1800 |
| Starting Watts | 2200 |
| Amps | 15A / 18.3A |
| Engine Type | Westinghouse, 4 Stroke, 79cc, OHV |
| Starting Method | Recoil |
| Outlets | (1) Duplex, NEMA 5-20R 120V, (1) 12V DC8.3A |
| Fuel Tank | 1.3 Gallon |
| Run Time | 17 hours at 25% load / 13 hours at 50% load |
| Housing | High impact plastic, vibration mounted, sound attenuated, double insulated case |
| Portability | Light weight, ergonomically designed |

Oil & Tools Included

| | |
|---------------------|---------------------------------------------------|
| Accessories | Tool kit, 13.5 oz engine oil & EZ fill oil bottle |
| Warranty | 2 Year Limited |
| Sound Output | 52 dbA at 25% load / 59 dbA at 50% load |
| Emissions | EPA & CARB Certified |
| Benefits & Features | |

- 1) Power indicator light
- 2) AC overload reset
- 3) High efficiency run mode
- 4) Low oil shut down
- 5) Color coded user touch points
- 6) Parallel Capable*
- 7) Less than 3% THD

Dimensions & Weight

| | |
|-------------------|-----------------------------|
| Carton Dimensions | 21.3" L x 13.8" W x 20.0" H |
| Unit Dimensions | 20.3" L x 12.5" W x 17.8" H |
| Unit Weight | 43 Pounds |
